

## Recommended Electric Current Ratings for Circuit Breakers

Generators are 3ph + N convertible to single Ph 230vac

6 to 9kW one steam pipe outlet

12 to 18kW two steam pipes on top of generator, water inlet supply on right side low down, manual drain on right side, electrical power supply and low voltage cables on left bottom, where necessary the cables can be installed on the left

Current Ratings in kW	S ph amps	3ph + N per ph
3	15	
6	30	10
9	45	15
12	60	20
15	70	25
18	85	30
